

# **The Buggles Fan Website**

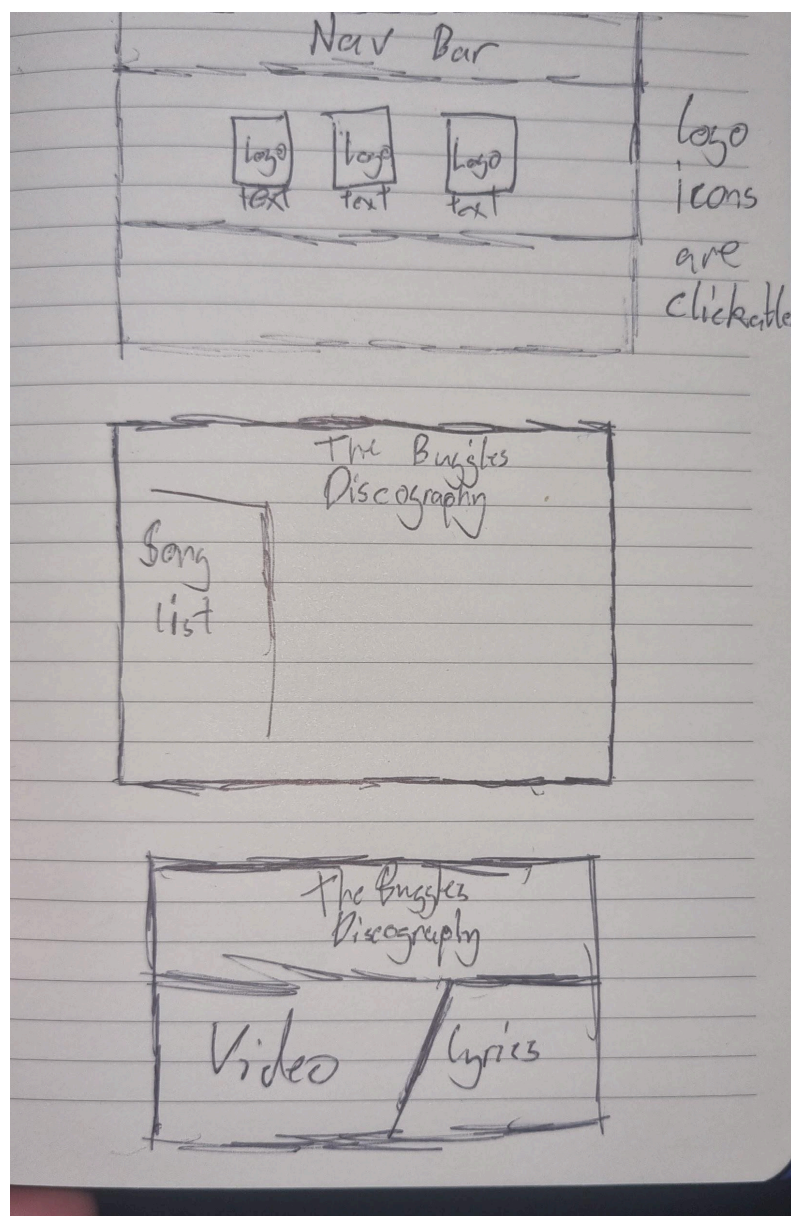

30.03.25

S00267967

## Proposal

This proposed website aims to create a visually engaging and informative website dedicated to The Buggles, the iconic band known for their hit song "Video Killed the Radio Star." The website will serve as a tribute to the band's legacy, giving access to all their music catalog while also filling out all the requirements needed for the project.

This website is majoritively my work. I will not deny it. Certain elements I was looking to include I learned from W3Schools or Stack OverFlow. For those few bits there are pointers in the HTML to show where

### [THIS IS A COLLEGE PROJECT](#)

The website contains 4 pages.

There the homepage where you can contact the website owner, View different video and radio platforms and begin to explore the buggles discography. The second page, the album page, is the page in which I show the covers of both albums and allow people to pick which album they'd like to explore. Both album pages are the same, having a list of songs and allowing you to pick which ones lyrics you'd like to read and songs you like to play. Finally the about page includes a bit more info about the buggles and a google map iframe of the studio they used

All the info for the writing was taken from using Quill Bot and the wikipedia of the Buggles.

## Validator Results

The results go as follows: index, Radio Star, albums, Plastic Age , Adventures in Modern Recording for the web pages. Then the CSS

Nu Html Checker

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change

Showing results for **index.html**

Checker Input

Show ☐ source ☐ outline ☐ image report

Check by   No file chosen

Uploaded files with .xhtml or .xht extensions are parsed using the XML parser.

Document checking completed. No errors or warnings to show.

Used the HTML5 parser.  
 Total execution time 2 milliseconds.

[About this checker](#) • [Report an issue](#) • Version: 25.3.6

- Warning

Section lacks heading. Consider using `h2-h6` elements to [add identifying headings to all sections](#), or else use a `div` element instead for any cases where no heading is needed.

From line 28, column 13; to line 28, column 44

`<section class="carousel-item">`
- Warning

Section lacks heading. Consider using `h2-h6` elements to [add identifying headings to all sections](#), or else use a `div` element instead for any cases where no heading is needed.

From line 32, column 13; to line 32, column 44

`<section class="carousel-item">`
- Error

No space between attributes.

At line 38, column 49

`<oltime-radio/>class="carousel`
- Warning

Section lacks heading. Consider using `h2-h6` elements to [add identifying headings to all sections](#), or else use a `div` element instead for any cases where no heading is needed.

From line 36, column 13; to line 36, column 44

`<section class="carousel-item">`
- Warning

Section lacks heading. Consider using `h2-h6` elements to [add identifying headings to all sections](#), or else use a `div` element instead for any cases where no heading is needed.

From line 27, column 9; to line 27, column 34

`<section class="carousel">`
- Error

The element `a` must not appear as a descendant of the `button` element.

From line 48, column 81; to line 48, column 118

`<a href="https://irishradioive.com/">Play R`
- Error

The element `a` must not appear as a descendant of the `button` element.

From line 52, column 81; to line 52, column 181

`<a href="https://www.youtube.com/watch?v=c1LHCpyQ5N8&list=OLAKSuy_kDa9MW3a5Uqdp-YrJcdal1zThG3VatJaxk">Play V`
- Warning

Section lacks heading. Consider using `h2-h6` elements to [add identifying headings to all sections](#), or else use a `div` element instead for any cases where no heading is needed.

From line 45, column 9; to line 45, column 38

`<section class="media-player">`

All these while errors don't change the websites functionality

Checker Input

Show ☐ source ☐ outline ☐ image report

Check by   No file chosen

Uploaded files with .xhtml or .xht extensions are parsed using the XML parser.

Use the Message Filtering button below to hide/show particular messages, and to see total counts of errors and warnings.

Message Filtering

- Warning

Section lacks heading. Consider using `h2-h6` elements to [add identifying headings to all sections](#), or else use a `div` element instead for any cases where no heading is needed.

From line 18, column 5; to line 18, column 37

`/nav><section class="split-container">`

This above was the same for Albums ,Age of Plastic , Adventures in modern Recording and the About page as these didn't use anything else of issue but sections.

## The CSS

W3C CSS Validator results for style.css (CSS level 3 + SVG)

**Congratulations! No Error Found.**

This document validates as [CSS level 3 + SVG](#) !

To show your readers that you've taken the care to create an interoperable Web page, you may display this icon on any page that validates. Here is the XHTML you could use to add this icon to your Web page:

(Insert the icon with > instead of /> if using HTML <= 4.01)
